PARTNER ANALYTICS OVERVIEW

What we measure. What you receive.

Consumed is a social entertainment platform — where users play, rate, predict, and share everything they consume across TV, film, music, books, podcasts, and gaming. This document outlines the behavioral data Consumed can surface for brand and media partners.

Platform availability: iOS app and web app. Android not yet available.

01 AUDIENCE SIZE & REACH

— Total engaged users	Users who voted on at least one partner poll or trivia question during the activation period.
— Unique weekly reach	Distinct users reached per week across all partner content.
— New user acquisition	Users who joined Consumed during a partner activation window.
— Platform audience share	Percentage of total Consumed users who touched partner content.

02 CONTENT ENGAGEMENT

— Total votes cast	All responses collected across partner polls and trivia questions.
— Votes per question	Which individual questions drove the highest participation — shows what resonates.
— Poll completion rate	Users who answered all questions in a set vs. only one — measures depth of engagement.
— Most debated polls	Questions with the closest vote splits. High controversy = high engagement signal.

— Trivia accuracy rate	Percentage of correct answers — a proxy for audience knowledge depth and show familiarity.
— Time to first vote	Average time between poll publish and first user response. Faster = more invested audience.

03 AUDIENCE PROFILE — WHO THEY ARE

— Genre preferences	Drawn from Entertainment DNA profiles — what partner-engaged users love beyond your content.
— Top tracked titles	Shows, movies, books, and podcasts most logged by users who engage with partner content.
— Age-proxy signals	Inferred from content preferences and Entertainment DNA responses — not self-reported.
— Taste segments	Behavioral groupings based on what users actually consume (e.g. 'Reality Superfan,' 'Crime Drama Devotee').

04 CROSS-MEDIA BEHAVIOR

— Avg media categories per user	How many of the 6 content types (TV, film, music, books, podcasts, gaming) each user actively tracks.
— Full audience fingerprint	What partner-engaged users watch, read, and listen to beyond your content — the complete entertainment picture.
— Co-viewing overlap	Other titles tracked by users who engage with partner content — surface adjacencies and competitive context.
— Cross-format reach	% of partner audience that also tracks music, books, or podcasts — demonstrates cross-media intelligence value.

05 HABIT & RETURN BEHAVIOR

— Login streaks	% of partner-engaged users who built 3-day or 7-day streaks during the activation period.
— Repeat engagement	Users who voted in multiple consecutive partner poll sets — the loyalty signal.

— Time to first engagement	How quickly after signup users voted on partner content — lower = stronger hook.
— 30-day retention	% of users still active 30 days after first engaging with partner content.

06 SOCIAL AMPLIFICATION

— Partner-related posts	Reviews, reactions, thoughts, and hot takes posted by users referencing partner content.
— Likes & comments	Social engagement on partner-related posts within the Consumed feed.
— Referral & shares	Friend invites or content shares triggered by partner activations.
— Leaderboard intensity	Number of users competing for top spots during a partner-activated week — measures competitive engagement.

07 PREDICTION & OUTCOME DATA

— Pre-air audience predictions	How users predicted show outcomes before episodes aired — intent and anticipation data.
— Prediction accuracy rate	Did the audience call it right? Measures audience knowledge and show predictability.
— Sentiment split	Which outcomes users hoped for vs. expected — separates desire from prediction.
— Biggest upsets	Where the audience consensus was wrong — highest surprise value moments.
